[LinkedIn](#) | [GitHub](#)

Highly accomplished GIS Expert and Project Coordinator with over 4 years of experience in advanced spatial data analysis, visualization, and technical leadership. I specialize in driving automation within geospatial technologies by integrating Machine Learning and Artificial Intelligence (Random Forest, SVM, CNN) into complex spatial workflows. My expertise extends to full-stack Web GIS development, automated web scraping and data extraction using Playwright and Python, UI/UX prototyping in Figma, and the creation of custom plugins, interactive dashboards, and automated reporting tools. Proficient in end-to-end project coordination, QA/QC pipeline management, and cross-functional team leadership. With a strong background in Geomatics and a proven track record of coordinating large-scale digitization, geospatial data enrichment, and environmental projects, I excel at bridging the gap between sophisticated spatial engineering and strategic project management.

EXPERIENCE

JANUARY
2026---
PRESENT

PROJECT COORDINATOR (GIS/RS)

Metavystic Private Limited (Rawalpindi)

In my current role as Project Coordinator, I direct the end-to-end lifecycle of multiple concurrent Geospatial and Remote Sensing projects, ensuring all deliverables strictly adhere to technical specifications and organizational milestones. I serve as the primary operational liaison between technical teams and corporate clients, translating complex business requirements into actionable GIS workflows and clear project roadmaps. My leadership involves supervising multidisciplinary teams, providing technical mentorship, and managing resource allocation to optimize productivity. I have designed and implemented automated web scraping pipelines using Playwright and Python for large-scale geospatial data extraction, including POI enrichment and real estate listing aggregation across multiple platforms. I conduct rigorous QA/QC processes on spatial datasets, ensuring data integrity through deduplication, cross-validation, and systematic quality audits. Additionally, I leverage Figma for UI/UX prototyping and stakeholder presentations, and have implemented robust monitoring systems to track project progress, resolve technical bottlenecks, and provide high-level reporting to key stakeholders.

AUGUST
2025—

VISITING LECTURER (GRADUATE AND POST GRADUATE STUDIES)

Brains Institute Peshawar (Khyber Pakhtunkhwa)

As a Visiting Lecturer at Brains Institute of Peshawar, I delivered graduate and postgraduate courses in Geographic Information Systems and Remote Sensing. I designed curriculum content covering spatial databases, advanced geospatial analysis techniques, and hands-on training with industry-standard software platforms. I

MARCH 2023--

-

mentored students through applied research projects and fostered practical competencies in spatial data management and visualization.

Subjects: Spatial Databases | Hands-on training on Geospatial software programs

Students under supervision: I have supervised eight students and currently I am supervising five students.

GIS CONSULTANT (FREELANCE)

As a freelance GIS Consultant, I deliver data-driven geospatial solutions focusing on advanced spatial analysis, environmental modeling, and disaster risk assessment. My expertise spans complex site suitability modeling, UAV-based terrain mapping, web scraping for geospatial data enrichment, and extensive land record digitization. I actively leverage Machine Learning algorithms and statistical programming (R, Python) to execute predictive analyses including flood susceptibility modeling, climate change impact assessments, and Spatio-temporal environmental monitoring providing clients with robust, actionable insights.

The list of projects accomplished by me are given in next page.

DECEMBER
2023 -
PRESENT

GIS ANALYST (PROJECT BASED)

Agriculture University Peshawar (Khyber Pakhtunkhwa)

As a GIS Analyst at Agriculture University Peshawar, I gathered and processed spatial data for institutional research projects using ESRI products including ArcGIS and complementary data analysis tools. I produced cartographic visualizations and analytical charts to communicate findings effectively, conducted QA/QC on geospatial datasets to ensure accuracy and consistency, and delivered end-user training programs on GIS and Remote Sensing applications in agriculture.

OCTOBER
2025--
JANUARY
2026

GIS ASSOCIATE/ANALYST

Excise Taxation & Narcotics Control Department (Government of Khyber Pakhtunkhwa Province)

As a GIS Associate at the Khyber Pakhtunkhwa Excise Taxation & Narcotics Control Department, I led the digitization of property taxation records across District Peshawar. I supervised a team of 21 GIS subordinates conducting field-based property taxation surveys, established QA/QC protocols for data validation, and ensured spatial accuracy and completeness of all digitized cadastral records.

APRIL 2022-
SEPTEMBER
2024

GIS INTERN (VOLUNTEER)

Forest Planning and Monitoring Circle Peshawar (Khyber Pakhtunkhwa Forest Department)

Key Roles: GPS-based field data collection, digitization of cadastral maps, detailed land cover classification and mapping of command areas, generation of comprehensive geospatial reports, and quality assurance of spatial datasets for forest planning and monitoring initiatives.

EDUCATION

SEP 2021 -
JUNE 2025

BACHELORS OF SCIENCE IN GEOMATICS (GIS/RS)

Received 2nd position in session 2021-25 with CGPA 3.85 (86%).

Major courses studied are: Geography (Lithosphere, Atmosphere and Hydrosphere, Human Geography, Environmental Geography, Economic Geography).

Map work and projections, Fundamentals of GIS, Cartographic Techniques, Surveying and Leveling, SDSS, Geo statistics, Advance Photogrammetry and Remote sensing, Programming, Project Management.

Final Year Research Title:

Climate Change Impact on Snowmelt and Runoff in Chitral River Basin in Himalayan Hindukush (HKH) Region from 2000 to 2024

2025--

MASTER STUDIES IN PROJECT MANAGEMENT

2025

HUAWEI CLOUD ARTIFICIAL INTELLIGENCE COURSE

SKILLS

- Hands-on experience of GIS and Remote sensing
- Python Programming and Automating workflow in GIS | Web Scraping (Playwright, Selenium) | QGIS Plugins | ArcPy Tools
- Excellent communication skills, both verbal and written
- Proficiency in R Programming
- Google Earth Engine Expertise
- Data Collection using Mobile Technologies.
- Microsoft Office
- Drone Mapping
- Artificial Intelligence in GIS and Remote Sensing
- Database Management System and PostGIS | QA/QC | Project Coordination
- Web GIS development
- GUI for GIS development | Figma (UI/UX Prototyping)
- **GIS softwares:** ArcGIS | ArcGIS Pro | QGIS | SNAP | GEE | Erdas Imagine | Agisoft | Idrisi | InVEST

ACTIVITIES

- Active member of Khattak Student Association (KSA) and Cultural secretary of KSA for session 2023-24.
- Joint Secretary of Khyber Geomatics Society (KGS) for session 2022-23, General Secretary of KGS for session 2023-24, President of KGS for session 2024-25 and Chairman KGS for session 2025-26.
- Founder and chairman of South Youth Empowerment (SYE) student organization.
- Active political rights activist.

GIS and Remote Sensing Analysis Projects:

- Drone mapping of University of Peshawar
- Feasibility Study of new Road in District Peshawar
- Site Suitability Analysis for Waste/Dumping in Peshawar
- Land Record Digitization in Rawalpindi
- Groundwater potential Analysis in Hayatabad (Urban area of Peshawar district, Khyber Pakhtunkhwa)
- Water Canals Network System Upgradation and New Water Links in University of Peshawar
- Landslide Assessment and Debris Flow Hazard and Risk assessment in Northern Pakistan using UAVs and RAMMS (Balakot, Khyber Pakhtunkhwa, Pakistan)
- Flood Susceptibility, Risk, Hazard and vulnerability Assessment with socio economic impact (Chitral, Khyber Pakhtunkhwa, Pakistan).
- Meteorological and Agricultural Drought Analysis (Events, Intensity, Propagation of Drought) for whole Pakistan and Sindh Province using R.
- Urban Flooding and public concern and sentiment Analysis in Karachi, Sindh, Pakistan
- Check Dam and its catchment and command area Planning in Mulkhow, Chitral, Khyber Pakhtunkhwa.
- Flash Flood and public concern on Twitter (X) regarding Flash Flood in Swat, Khyber Pakhtunkhwa.
- Ecological Risk Assessment in Poyang Lake, China
- Crop yield prediction in Thailand using R
- Agricultural Farm Site Suitability Analysis in Ulaanbaatar, Mongolia.
- Impact of Land use and Land cover on Land surface Temperature in Mardan district, Khyber Pakhtunkhwa
- Meteorological Drought, Agricultural Drought and GRACE-based Groundwater Drought in Bannu Basin, Khyber Pakhtunkhwa using R.
- Impact of Land use Land cover on Ecological Quality in Peshawar district, Khyber Pakhtunkhwa using Geodetector.
- Impact of Climate change on Snowmelt and Runoff in Chitral River Basin in Hindukush Himalayan (HKH) region.
- Land use and Land cover change detection Analysis in River Indus Basin Downstream Turbela Dam.
- Spatio Temporal study of Carbon Sequestration in Guangdong Province, China
- Urban Heat Island (UHI) and Regional Heat Island (RHI) assessment impacted by rapid urbanization in Northern Punjab
- Cadastral Maps digitization in District Kurram

MACHINE LEARNING AND ARTIFICIAL INTELLIGENCE IN GIS/RS PROJECTS

- Landcover Detection/Classification using Artificial Intelligence through trained CNN Model for Satellite Imageries.
- Morphometric Analysis of Erosion using Support Vector Machine (SVM) Algorithm in Kunhar River Basin.
- Flood Susceptibility, Risk, Hazard, Vulnerability, Exposure and socioeconomic study in Sindh and Makran Coastal region using Random Forest Algorithm.
- Soil Loss prediction using multiple Algorithms (kNN, XGBoost, Random Forest) in Nowshera district, Khyber Pakhtunkhwa.
- Urban Heat Island in Zhengzhou, China using Machine Learning Algorithms

FIELD SURVEYS PROJECTS

- Data Collection for New Peshawar valley project under KP Planning and Development department using ODK.
- Data collection for Land use affected by Marble industry in Tehsil Mathra Peshawar using Kobo Toolbox.
- Data Collection using Kobo Toolbox for Socioeconomic impact of Landslides in Balakot Tehsil.
- Data Collection for flash flood 2022 effecters in District Nowshera.
- Data Collection for post flood recovery in District Nowshera using Kobo Toolbox.
- Field survey of Tehsil Takht-e-Nasrati, District Karak Crops affected by Climate change using Kobo Toolbox.
- Public health field survey for fresh water scarcity and tube wells using Kobo Toolbox for Tehsil Banda Daud Shah District Karak.

CERTIFICATIONS

- Participation Certificate of World GIS week in University of Peshawar (2022)
- Achievement Certificate of Quiz Competition in World GIS week in University of Peshawar (2022)
- Participation Certificate of 3rd International Conference on Sustainable Utilization of Natural Resources (SUN-R) (2023) in NCEG
- Participation Certificate of GIS Awareness Day Seminar (2023) in NCEG
- Participation Certificate of GIS Day Conference (2024) held in NCEG by NCEG and Soil and Water Conservation Khyber Pakhtunkhwa Department.
- Organizers Certificate of GIS Day Conference (2024) held in NCEG by NCEG and Soil and Water Conservation Khyber Pakhtunkhwa Department.
- Participation Certificate of 7th International Conference on Earth Sciences Pakistan (2024) in Baragali Campus University of Peshawar.
- Participation Certificate of 11th International Conference on Climate Change Induced Disasters Impacts on Food Security and Biodiversity (2025) in Baragali Campus University of Peshawar.
